

# In case of an earthquake in the classroom

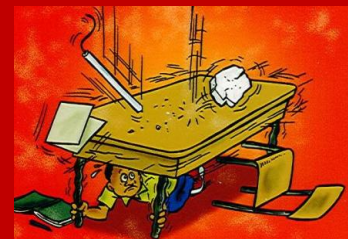

The Safety Plan for the Individual  
convenes an emergency committee

Right from the first tremor,  
protect yourself under a table

Protect your head

Hold the legs of the table,  
if it moves

Stay safe in a corner of  
a wall or in a doorway

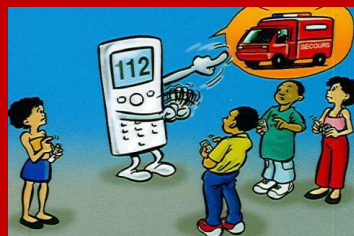

After the tremor, evacuate  
without panicking

Move away from buildings

Gather around adults who  
are calling the register

Do not make phone calls  
to let the lines free for  
emergency services

Follow the instructions,  
listen to the radio and wait  
for emergency services
